Domain Name Transfer Request

I, _____, of _____, hereby state that I am the current owner of the domain name identified below and that I authorize Visual Communications Group, Inc., ("VCG") to transfer such domain name's account from Visual Communications Group, Inc's Website Services program to the GoDaddy account information I've designated below.

The domain name to be transferred is _____

I understand that the removal of my domain name from VCG's Website Service program will result in the removal of any website or email accounts associated with my domain name, and that I am fully responsible for backing up all related information related therein. I understand that, due to these delays, my website and email accounts associated with my domain name may not be accessible, and email information may be lost for those accounts until I have been able to restore sufficient hosting to support my domain name.

Please transfer all information (Registrant, Administrative, Technical, Billing, Nameserver) relating to my domain name according to the following account:

I have a GoDaddy Account: Account Number: _____
Email address associated with this account: _____

I have read the steps necessary to transfer my domain name from GoDaddy to another registrar on GoDaddy's website - https://www.godaddy.com/help/transfer-domain-to-another-registrar-3560, and would like to transfer the domain name to another registrar. I understand that I must create an account with GoDaddy, and then provide you with this information. Once my domain name has been transferred to my GoDaddy account, I will perform the steps necessary to transfer the domain name myself.
